

This is the landing page of delivery manager, where we have 2 modules
1)Routes and 2)Delivery along with action items daily manifest, call customer,
returns.

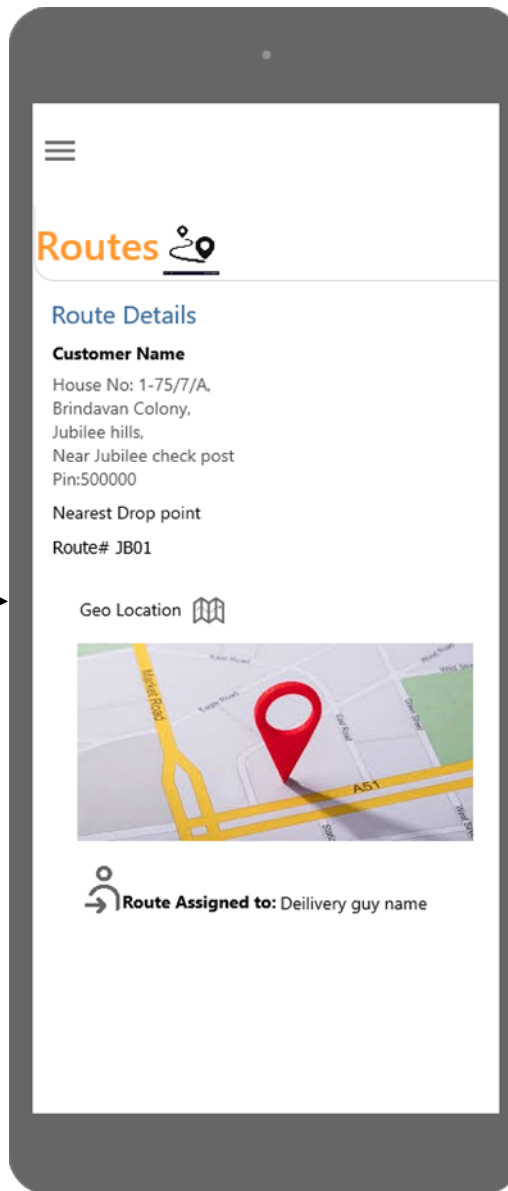

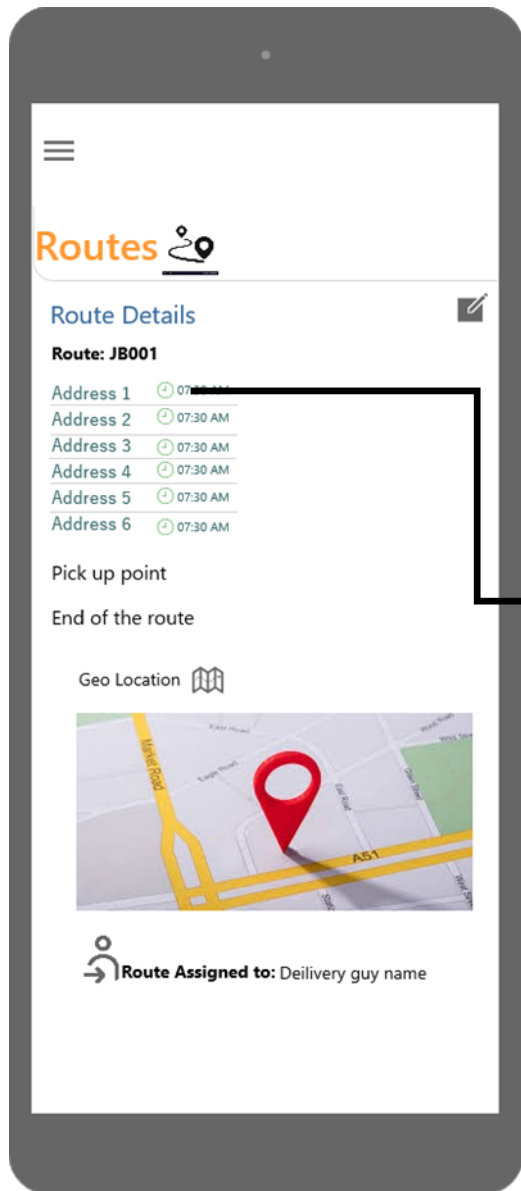

By Tapping on the Routes, we'll be redirected to this page where the manager can find the routes in a list view along with a basic info such as: route code, pick-up time(green colour), end time(red Colour) assigned to(delivery guy name) and options at the end of the tab(the three dots)

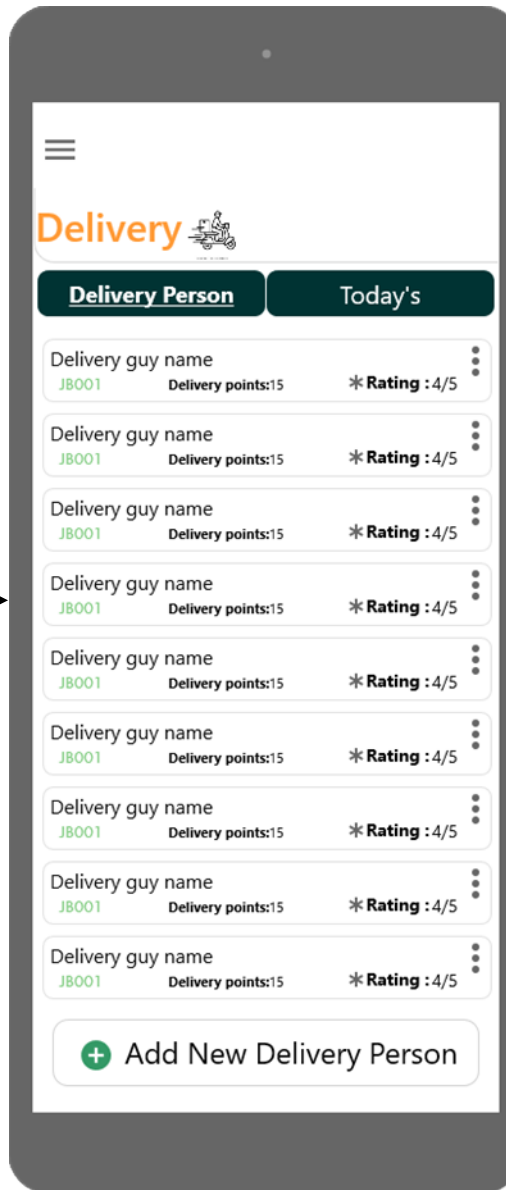

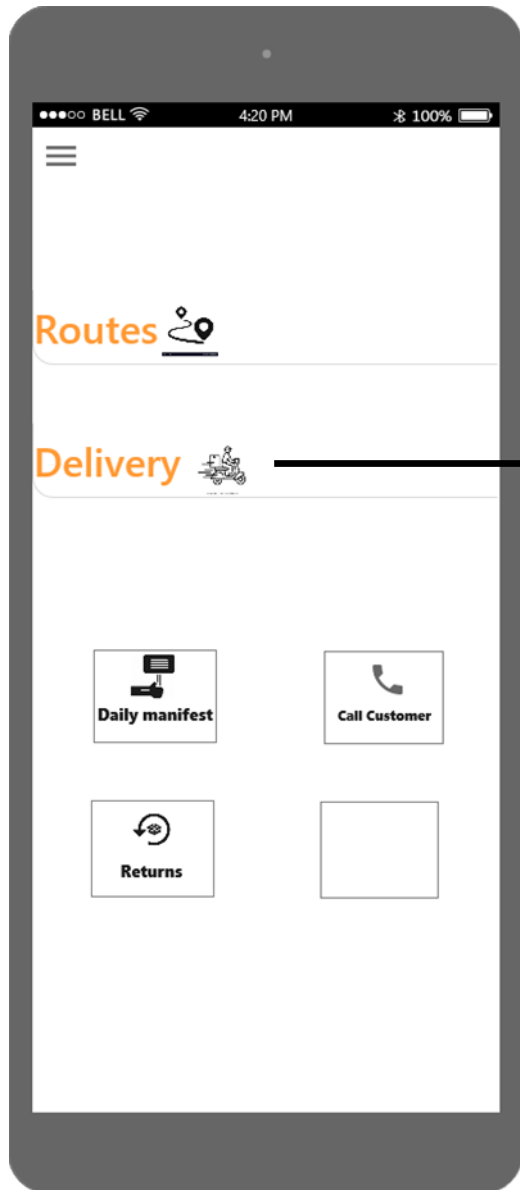

By Tapping on the three dots, we'll be able to find two options where a delivery manager can assign that particular route to a delivery guy and also he can track the assigned delivery.

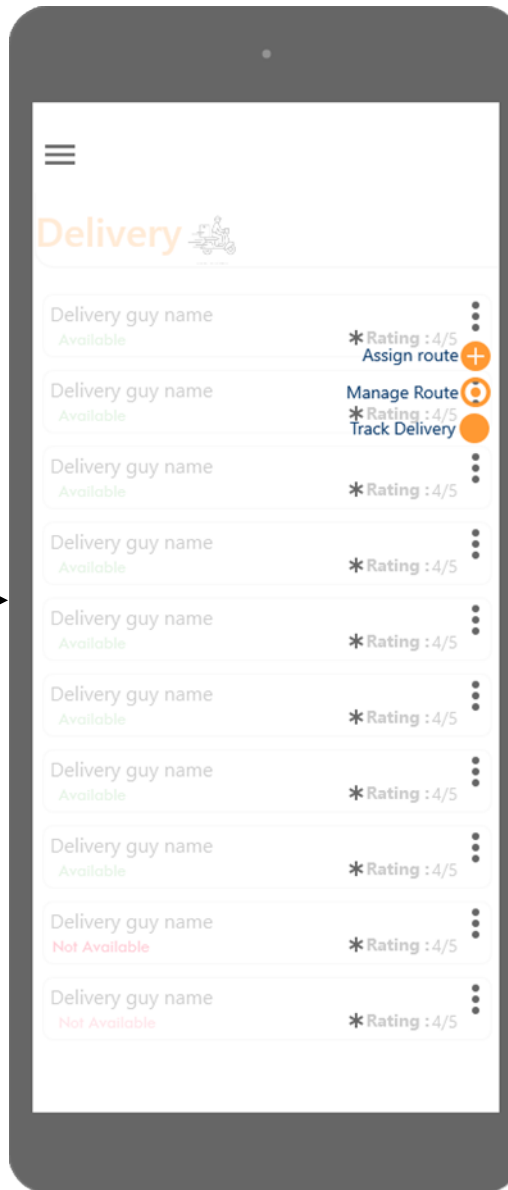

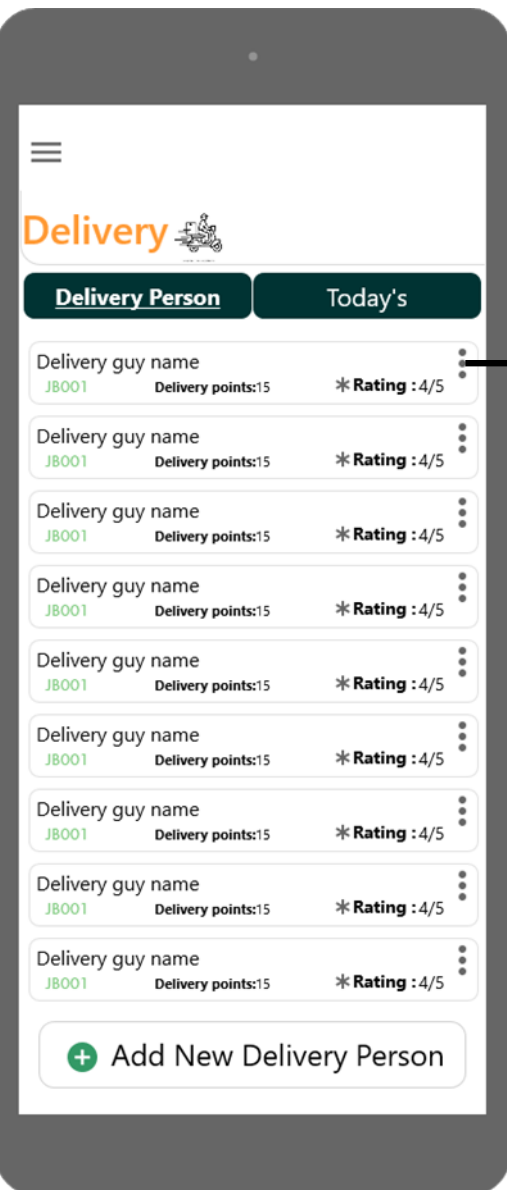

By Tapping on the tab, we'll be redirected to this page where we'll be able to find the information of how many addresses where assigned to that particular route, and each address is tap able, pick up point of the route, end of the route along with a Map and assigned delivery guy's name.

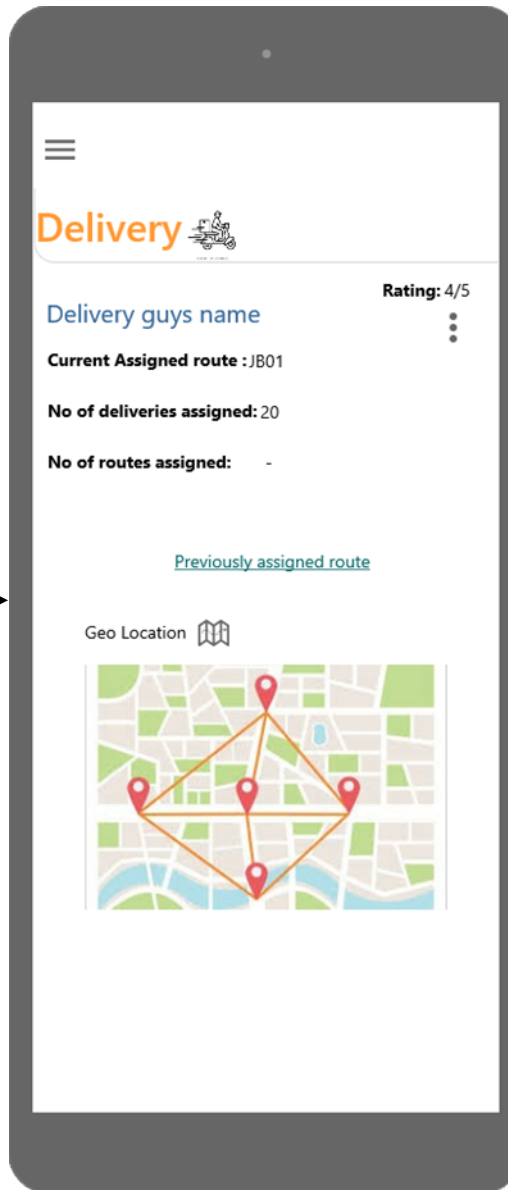

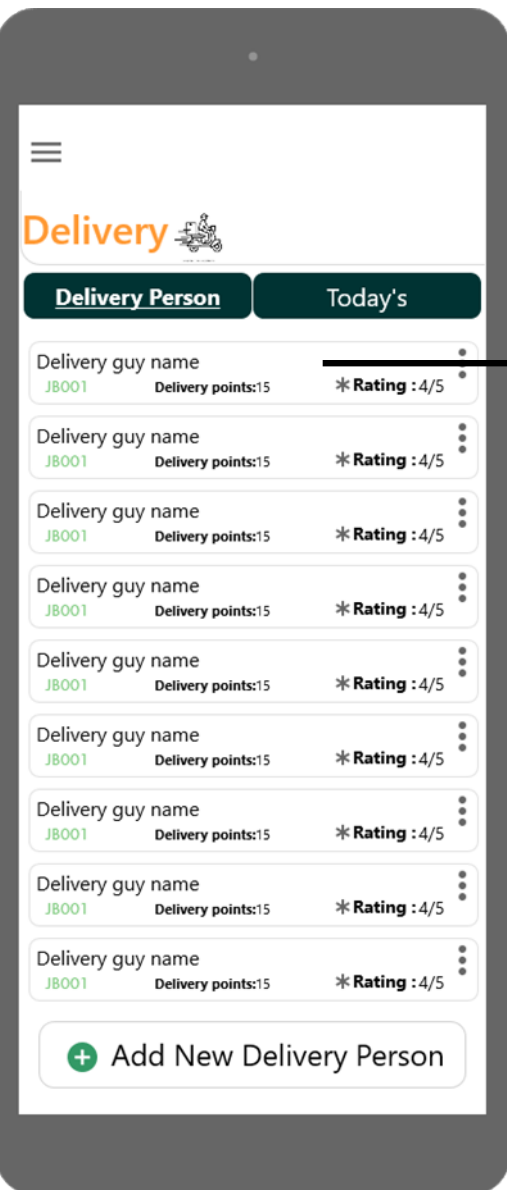

By Tapping the address we'll be redirected to this page where we can get the details of the particular address.

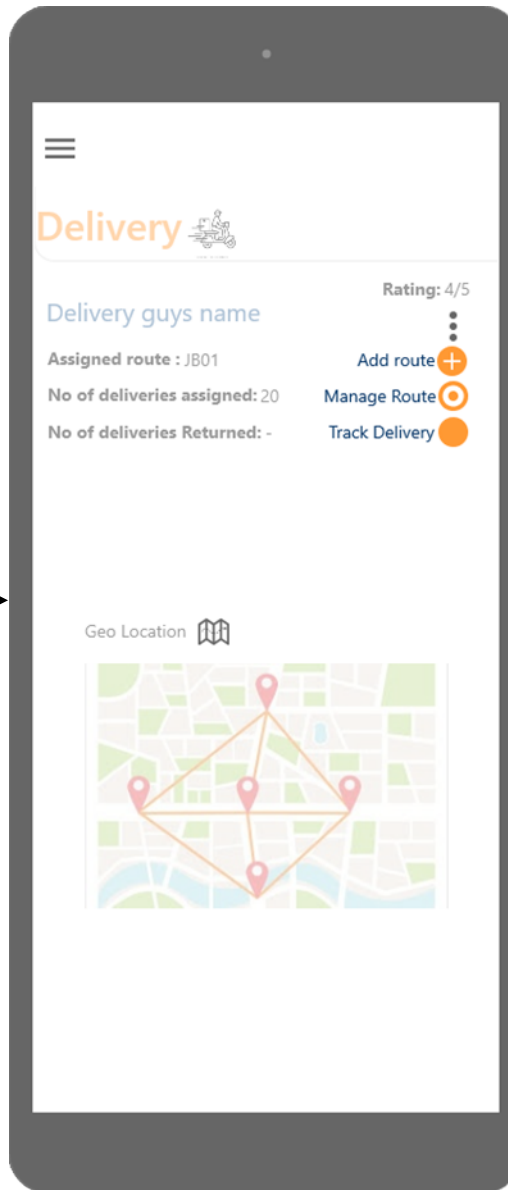

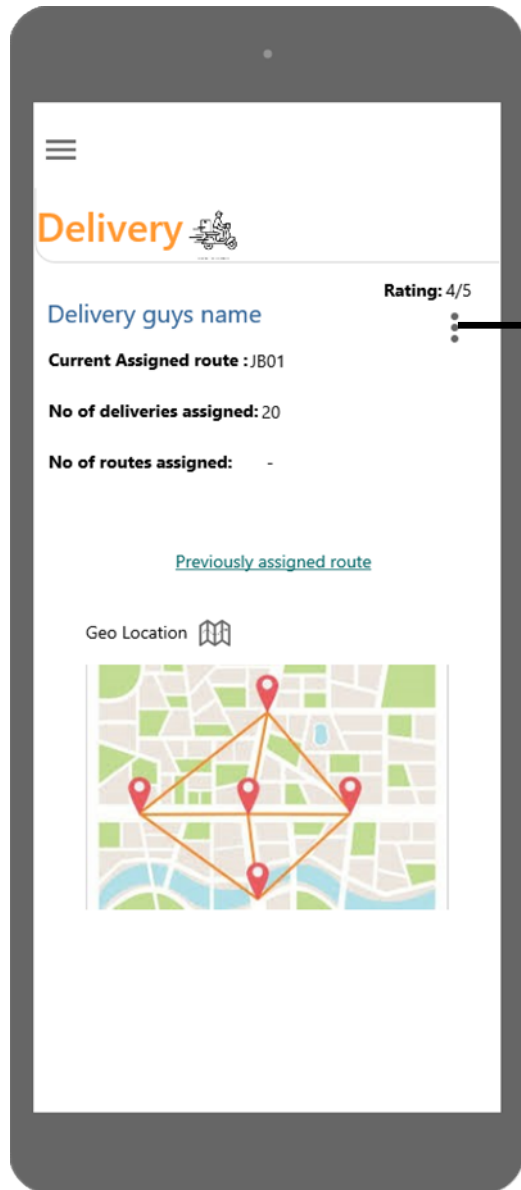

By Tapping on delivery, we'll be redirected to this page, on the top of page there will be two tab's 1) delivery person where we'll be able to find the information of delivery guys along with assigned routes and delivery points and rating of the delivery person, and another is 2) Today's where we can find all the information of current day's deliveries and returns.

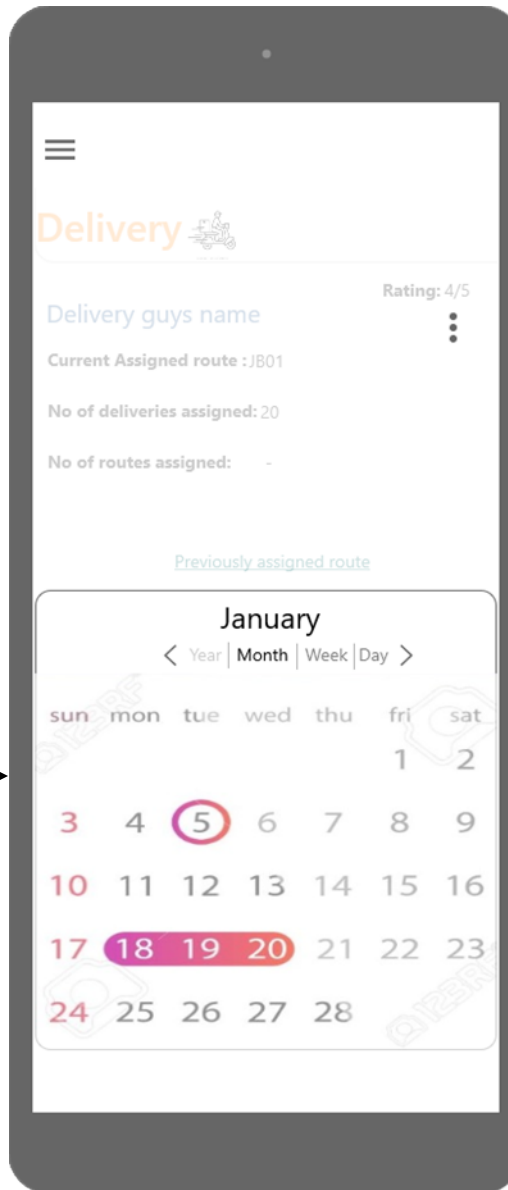

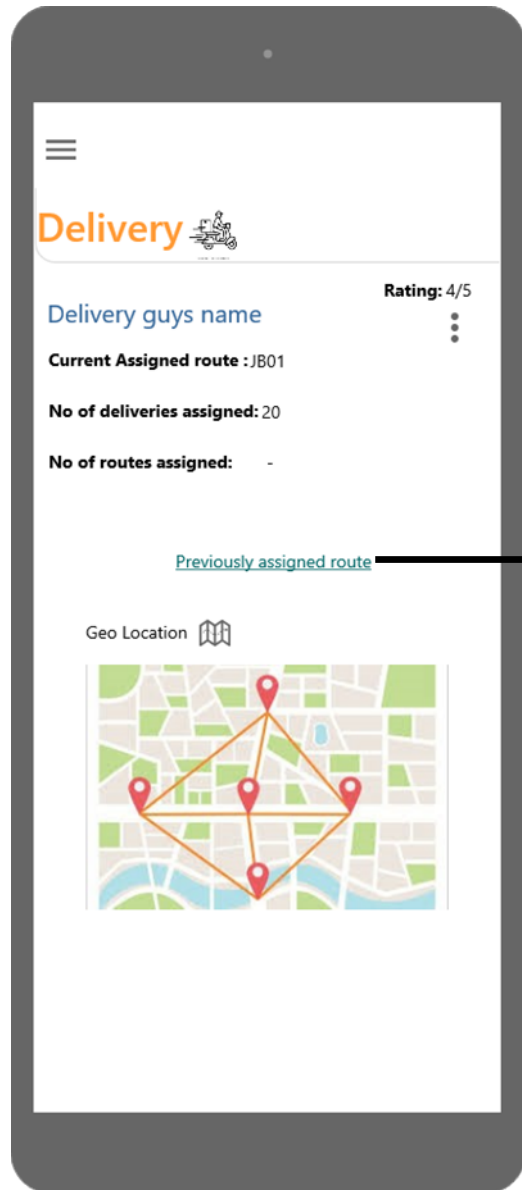

By Tapping on the three dots, we'll be able to find three options where a delivery manager can assign this particular delivery guy to a route, and also can be able to manage the route, also he can track the assigned delivery.

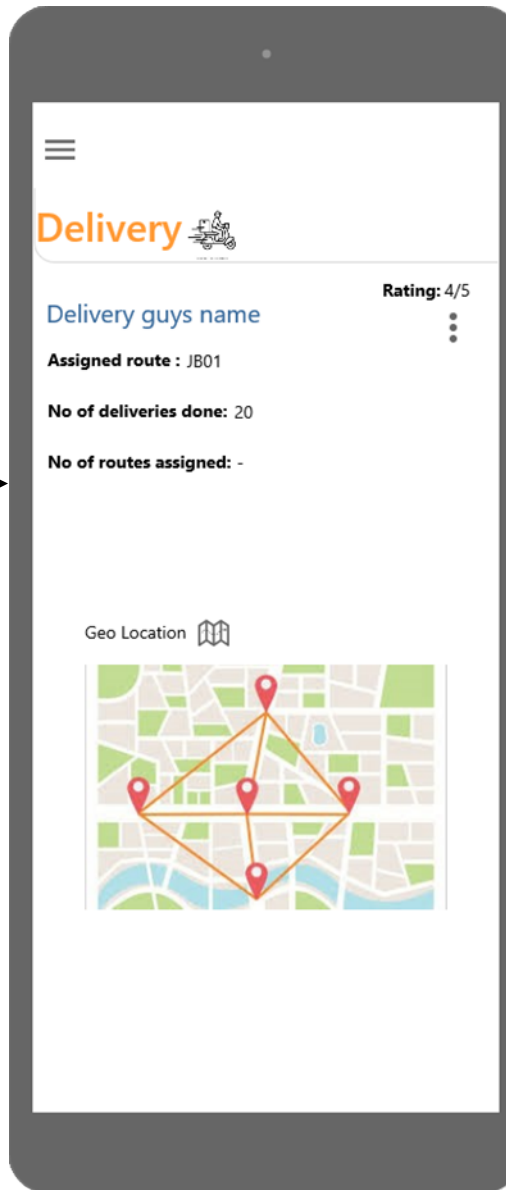

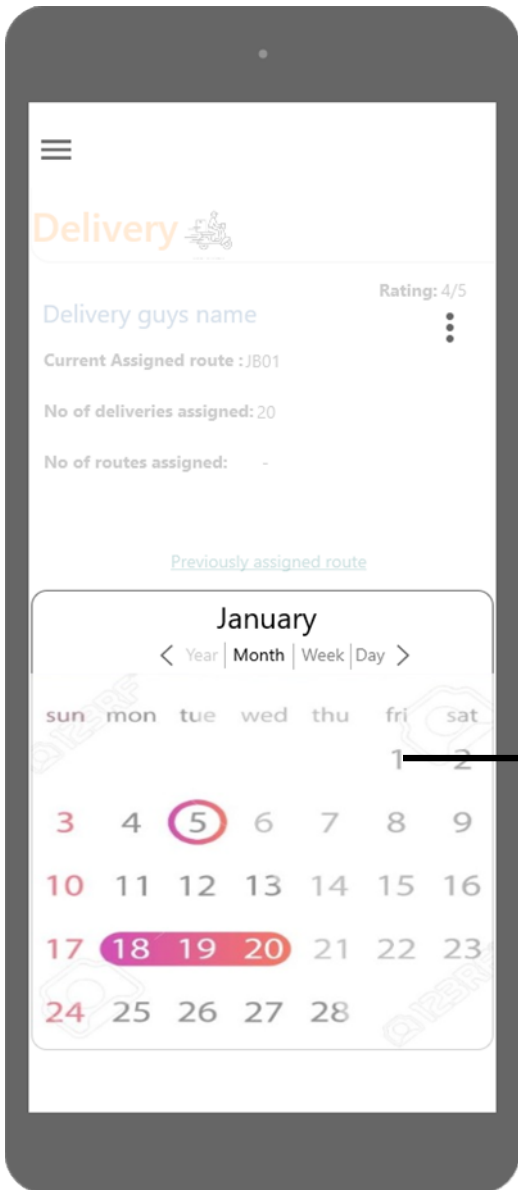

By Tapping on the tab, we'll be redirected to this page where we'll be able to find the information of the current assigned route, no of deliveries assigned and no of route's assigned along with an option of previously assigned routes to that particular delivery guy.

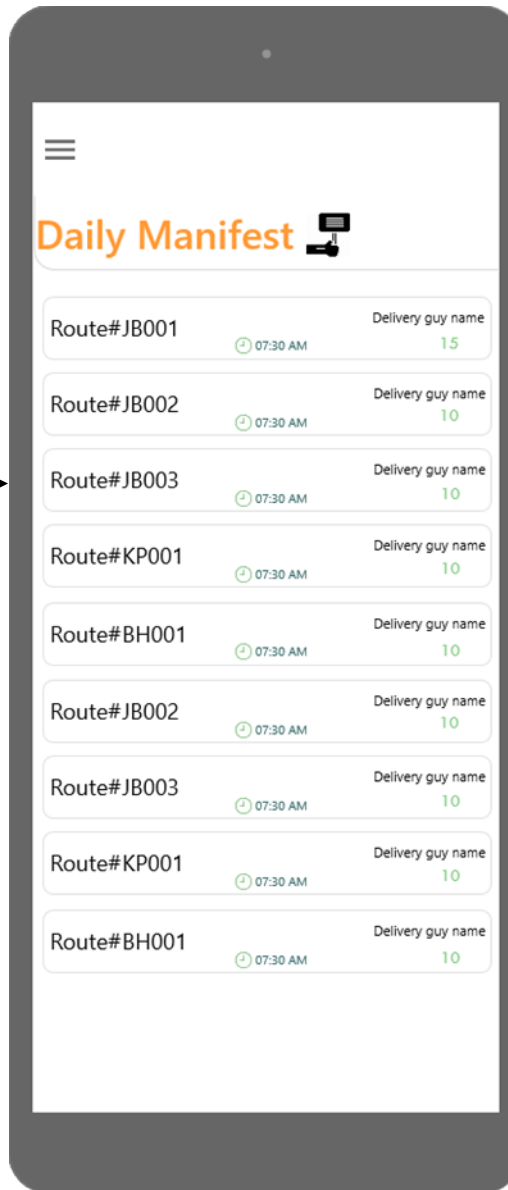

By Tapping on the three dots, we'll be able to find three options where a delivery manager can add another route to the delivery guy, and also can be able to manage the route, also he can track the assigned delivery.

By Tapping on previously assigned routes we'll be redirected to this page where the manager can see a calendar with "year, month, week and day" which are selectable accordingly.

By Tapping on a particular date we'll be able to find the information of delivery guy as per the date selected.

By Tapping on daily manifest we'll be able to find the information of the route, when was the pick up time and how many deliveries are done as of now and the delivery guy's name.
